

Flat Wire Brief introduction

1) Applications:

This product is used as hanging cable ,drawing cable and installation for field line,electric appliances and instruments,electronic equipments and automatic devices for electric power ,chemical and so on.the product is specially soft,easily folded and movable,smooth and ageing resistant,high pulse starting current resistant.

3) Standard:

GB/T 12706, IEC60502

3) Specifications:

Flame-retardent Flat Wire and Heat-resistant **Flat wire**.The product is especially flexible,easily folded and movable,smooth and unbending. Heat,cold,acid and alkali-resistant.

Operating features:

a: A.C rated voltage :0.6/1KV

b: long-term operating temp:-40 ~105 for butyronitrile flat cable

c: the min environmental operating temp:-40 fixed installation

d: the laying temp of cable should not be less than 0 ,it shall be pre-heated if it is less than the min.laying temp.
